

ChineseInputMethod

Follow these instructions to enable Chinese Input Methods in ThinLinc

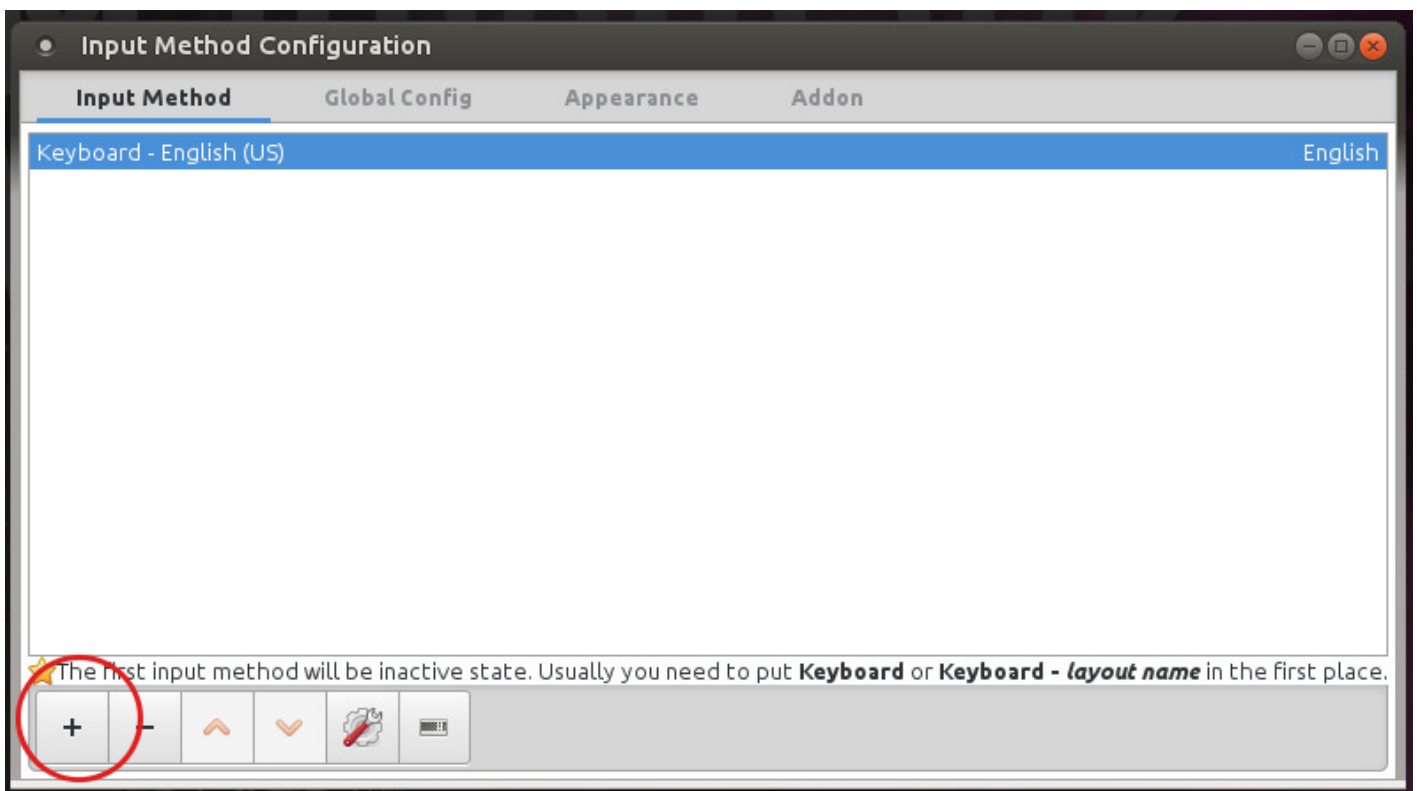

1. Start `Fcitx` from the Applications menu

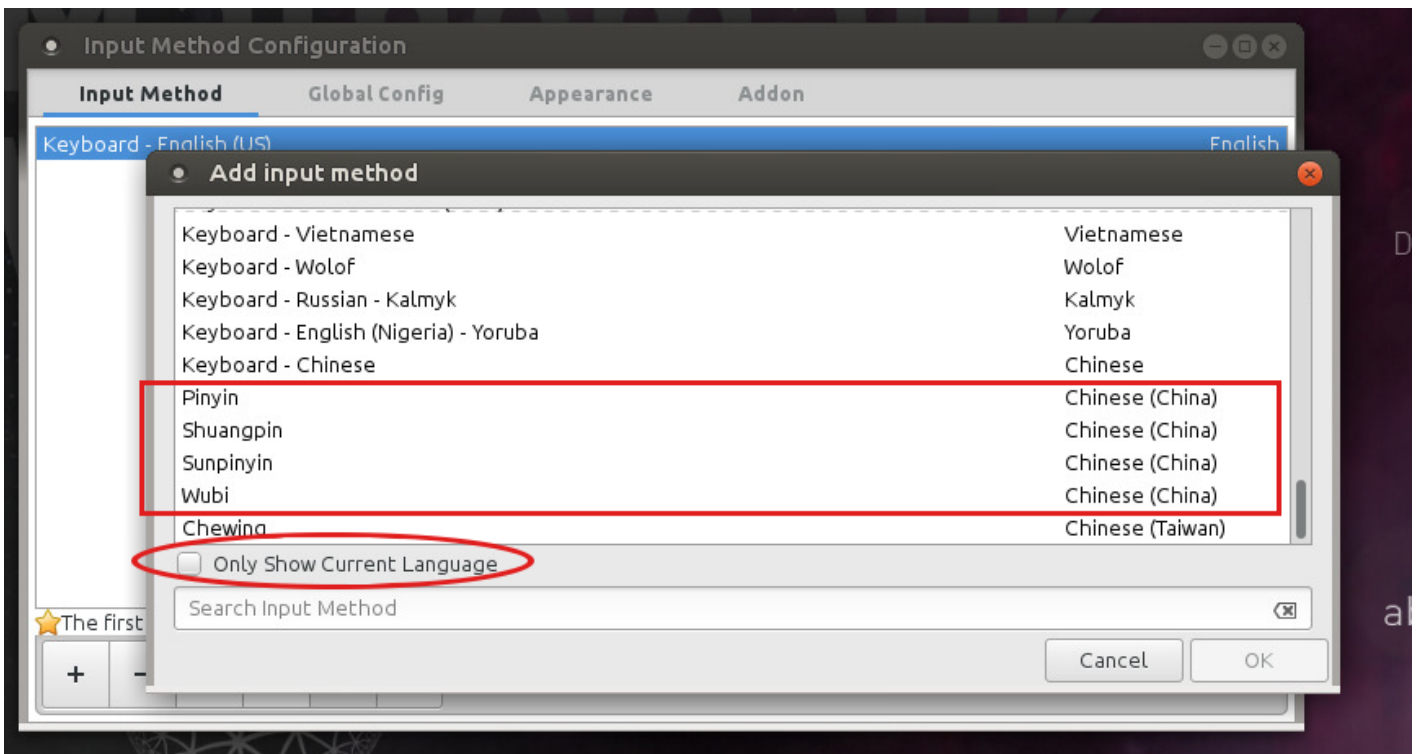

2. In the upper right corner of the screen, right click on the keyboard icon and left click on `Configure Current Input Method`

3. Click on the plus-sign in the Input Method Configuration window

4. Untick ☐ Only Show Current Language and scroll to the bottom of the window. Select the input method you want to use. When done, press

5. Close the `Input Method Configuration` window.

6. Open `.profile` file in your home directory with a text editor and add following lines

```
export XMODIFIERS=@im=fcitx
export QT4_IM_MODULE=fcitx
export QT_IM_MODULE=fcitx
export GTK_IM_MODULE=fcitx
```

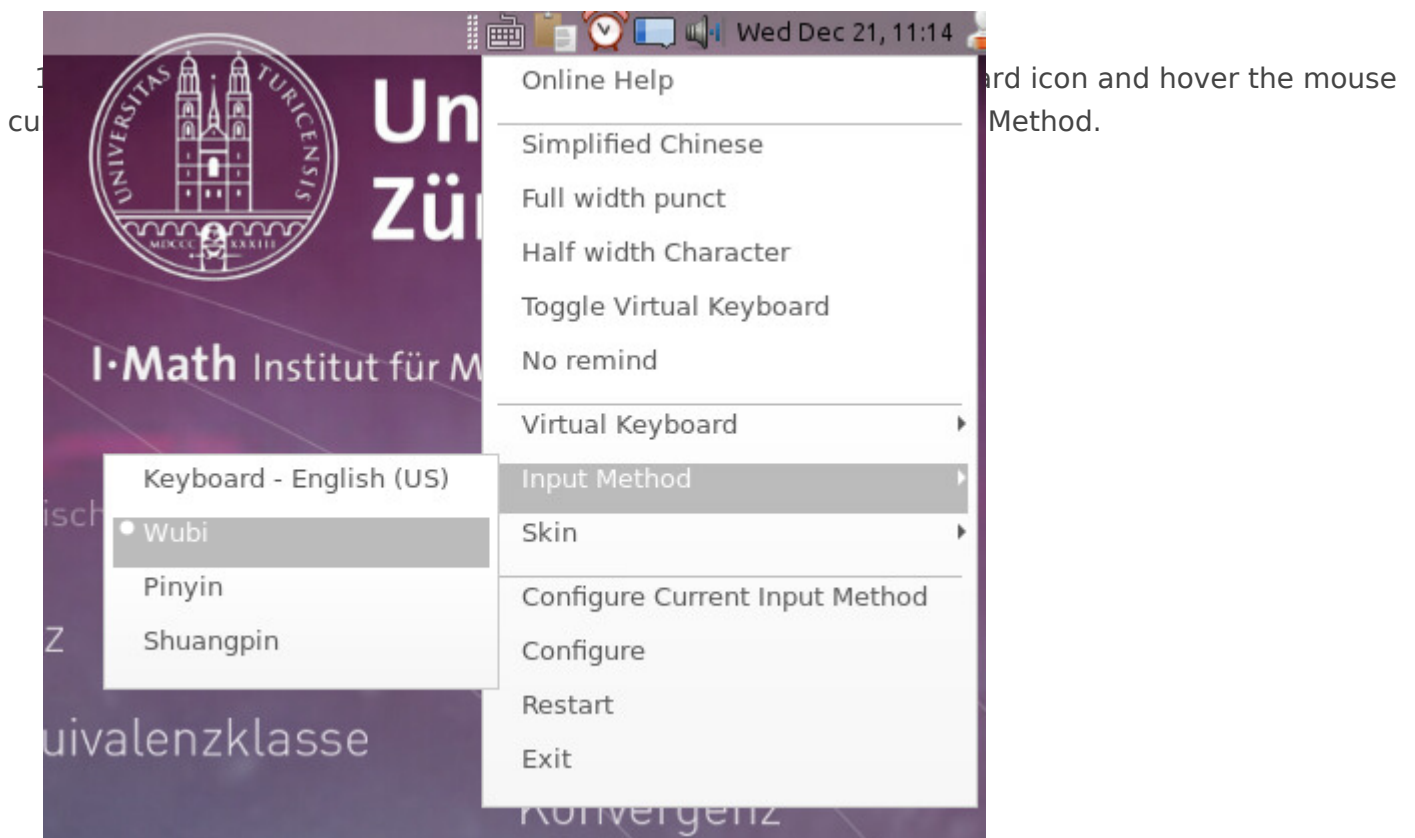

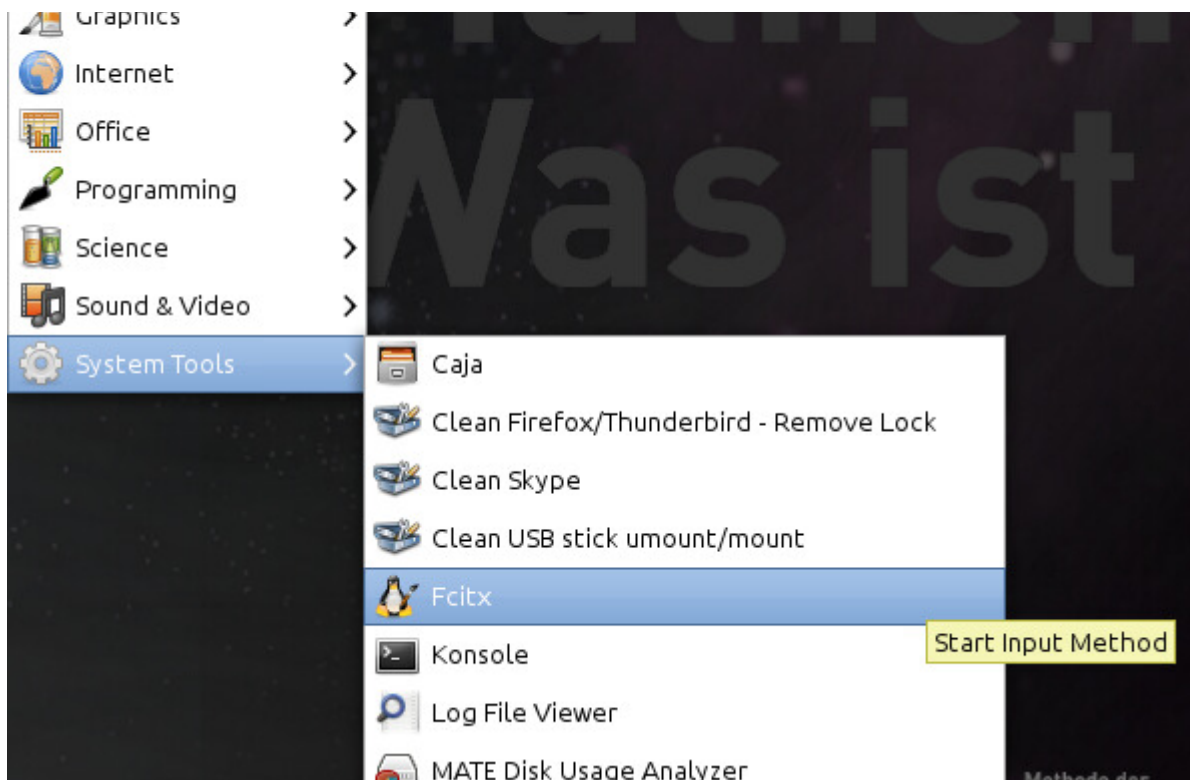

and save the file.

7. Logout of your session

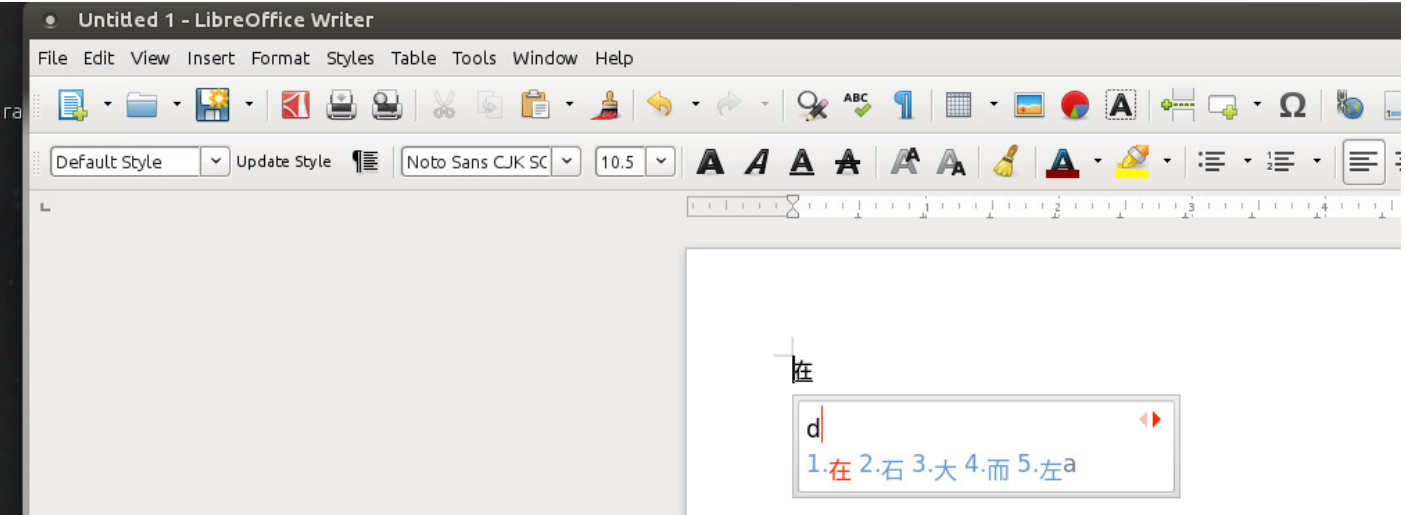

8. Login again

9. Start `Fcitx` from the Applications menu

11. You should now be able to type Chinese characters
