

diodon

- Powerful clipboard manager
- <https://github.com/diodon-dev/diodon>, [Wiki](#), [Bugtracker](#)

broken - no clipboard entries anymore

- diodon uses [Zeitgeist](#)
- Zeitgeist uses [SQLite](#)
- [TooManyResults error results in empty history](#), [Diodon often shows my clipboard history as 'empty'](#)

Quick Fixes

- Option 1: Stop and restart Diodon
- Option 2: <https://answers.launchpad.net/diodon/+question/701738>

```
pkill diodon
pkill zeitgeist-daemon
G_MESSAGES_DEBUG=all diodon > diodon_debug.txt
```

sqlite DB broken

- For whatever reason, even a sqlite database might break.
- If zeitgeist does not work, than diodon does not work.

```
# Testrun from diodon shows:
$ strace diodon
...
zeitgeist-clipboard-storage.vala:383: Add item unavailable not successful, error:
GDBus.Error:org.gnome.zeitgeist.EngineError.DatabaseCorrupt: Database corruption flag is set.
...
```

- Check the zeitgeist db:

```
$ sqlite3 ~/.local/share/zeitgeist/activity.sqlite 'VACUUM;'
```

- If this reports something like `Unable to execute SQL:` - this is the problem.
- Check zeitgeist:

```
$ zeitgeist-daemon -r
[09:25:01.337402 WARNING] sql.vala:150: It looks like your database is corrupt. It will be
renamed and a new one will be created.
[09:25:01.391462 WARNING] zeitgeist-daemon.vala:546: Can't create database: 10, disk I/O error
```

- If the past user activity is not important anymore, remove the broken db

```
$ pkill zeitgeist-daemon
$ rm -r .local/share/zeitgeist/
$ nohup zeitgeist-daemon -r &

# Restart diodon
$ pkill diodon
$ nohup diodon &
```
