

drive.math.uzh.ch

Summary

Server	https://drive.math.uzh.ch	
Username	<uzh shortname>	
Password	<Math password. Typically uzh webpass>	
Native Client	https://nextcloud.com/install/#install-clients	Already installed on Thinlinc
Access	worldwide	

Webaccess

- <https://drive.math.uzh.ch>

Native Client

Thinlinc

- Applications > Internet > Drive (nextCloud, ownCloud)
- You'll find a small 'cloud' icon on the upper right corner of the Thinlinc screen.

Non Thinlinc

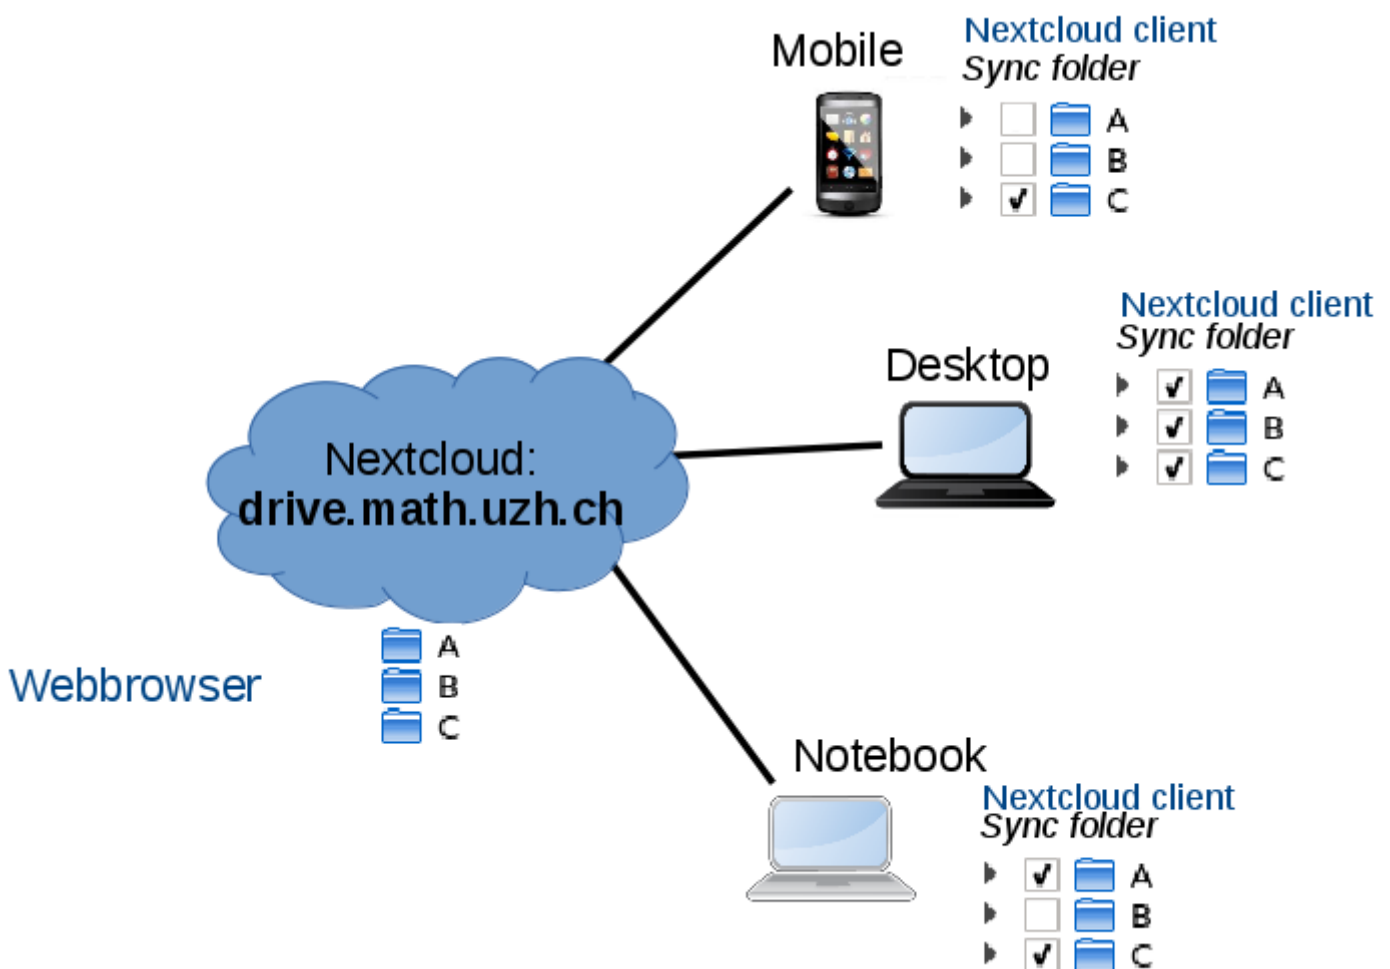

- Download: <https://nextcloud.com/install/>

Mobile

- Android: <https://play.google.com/store/apps/details?id=com.nextcloud.client>
- iOS: <https://apps.apple.com/us/app/nextcloud/id1125420102>

Sync different folder on different devices

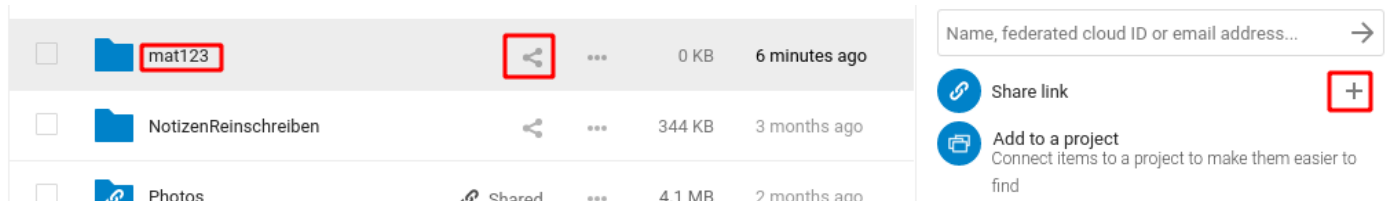

- Which folders to sync can be configured per device - on the device itself.
- Nextcloud Client (=App) > Settings > <config>
- Example:
 - The cloud has 3 directories A, B, C.
 - The mobile syncs only C.
 - The notebook syncs A & C
 - The desktop syncs A, B, C.

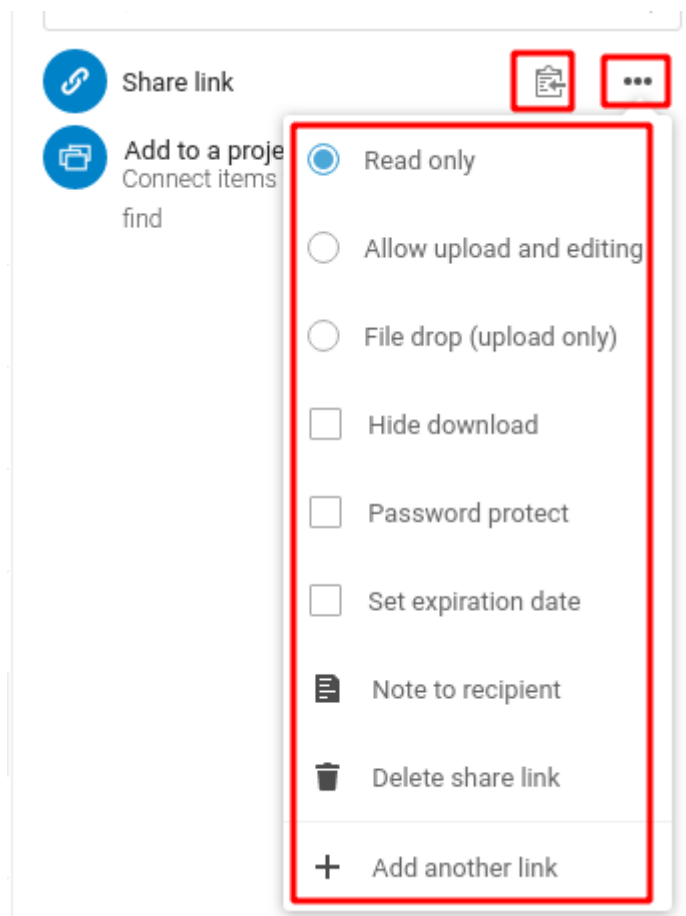

Share

Collaboration with UZH-user

- Files and Folder can be shared by person, groups or anonymously
- Choose the folder or file to share. Click on the share symbol. Click on the plus.

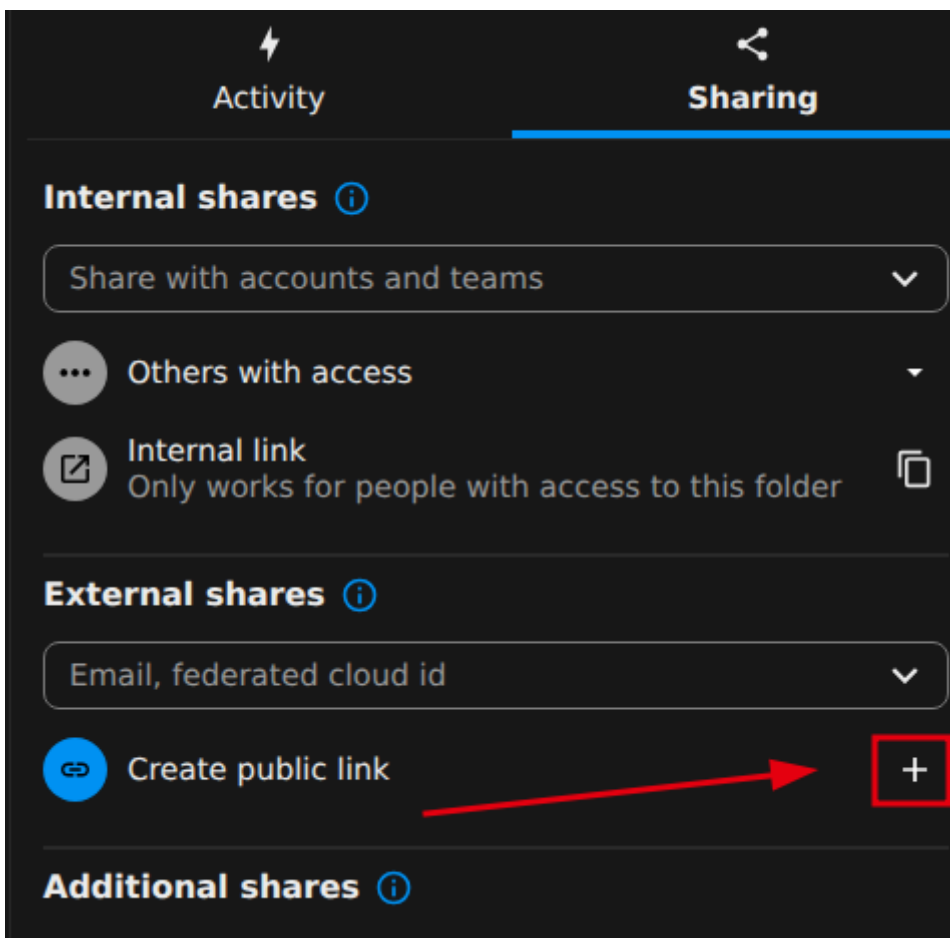

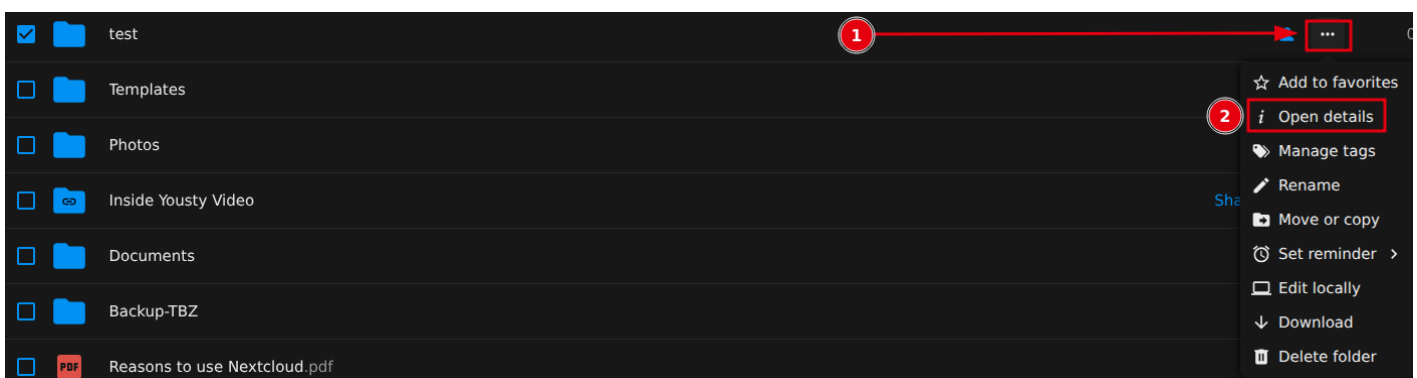

- Anonymous access:
 - Click on the settings (3 points horizontal) to specify privileges.
 - Click on the **clipboard** icon (you see no action, but the link is now in your clipboard)
... go to your email program and paste the link in an email.
- Optional, define a password.

Requesting confidential files from non-UZH-user (=anonymous)

- Creating a shared folder for anonymous user:
 - user can't see files stored in the folder
 - user can only upload to the folder
 - define whether a password is required to upload to the folder or not
- Login to <https://drive.math.uzh.ch/> (UZH-Credentials)
 - Navigate to "Files"
 - Create a new folder
 - Press the three dots and click "Open Details"

Problems

Mac OS X: sync is stale

Reset the Local Database:

- Warning: This forces a full re-sync but often fixes "stale" sync:
- Quit Nextcloud.
- Open Terminal and run:

```
rm -rf ~/Library/Application\ Support/Nextcloud
```
