

enableComposeKey

On the new NUC's Thinlic, the compose Key is may be not available. Please follow the instructions below to enable it:

1. click F8 and untick "Full Screen"
2. on the right corner click Applications-> Configuration -> Keyboard
3. select the tab "Layout"
 - untick "Use system defaults"
 - select "Keyboard model" i.e. "Generic 105-key"
 - select "Compose Key" i.e. "Right Win"
