

Livestreaming

For Livestreaming on Youtube we have a Camerasetup at the I-Math which you can get at K30 for streaming a Lecture or Seminar.

For a full introduction please Contact the IT-Support Group in K30 or write a mail to support@math.uzh.ch

What you need:

- Lenovo Yoga 260
- DVI2USB Adapter
- Sony Camera with the Tripod

Streaming

The Software to Stream is OBS and all things are configured already so you do not need to do anything there.

- If you do not see the video from the camera, please start the Epiphan software on the desktop to activate the connection between the camera and the laptop
- To start the Livestream just hit
 - Streaming is always to the I-MATH Youtube channel

- If you wish to stream to another channel, please contact us

Recording

You can also record the Livestream with this software so you can edit the Livestream and upload it afterwards.

- To start the recording hit [Start Recording](#)

If you want to record it with the camera and upload it, then you can get a Macbook at The IT-Office (J40) and use iMovie for cutting and rendering and after that you can upload it to Youtube.
