

obsidian

- Note Management App
- <https://obsidian.md/>

Sync

- Official (commercial) sync: <https://obsidian.md/sync>
- Alternative: Via any cloud storage (Nextcloud, onedrive, iCloud, ...), like I-MATH (<https://wiki.math.uzh.ch/public/nextcloud>)
 - Just save the Obsidian in vault in a directory which is synced via a cloud storage.
 - Attention: this works fine as long as you work on one obsidian instance at a time. If you change to a different computer, always close and restart obsidian on that one.

Plugins

- <https://nachbelichtet.com/das-sind-meine-10-wichtigsten-obsidian-plugins>
