

pdf compression

With `gs` on thinlinc

Source: <https://itsfoss.com/compress-pdf-linux/>

Via commandline:

```
gs -sDEVICE=pdfwrite -dCompatibilityLevel=1.4 -dPDFSETTINGS=/prepress -dNOPAUSE -dQUIET -
dBATCH -sOutputFile=compressed_PDF_file.pdf input_PDF_file.pdf
```

You have these compression options:

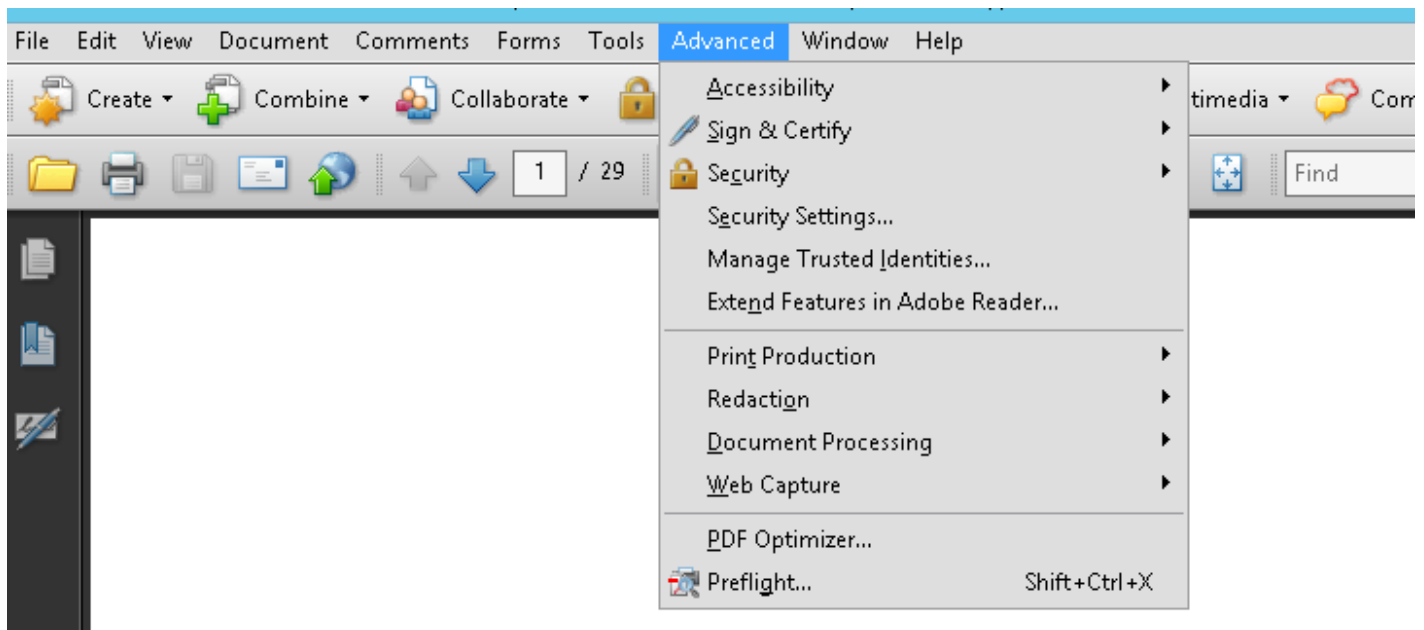

dPDFSETTINGS	Description
/prepress (default)	Higher quality output (300 dpi) but bigger size
/ebook	Medium quality output (150 dpi) with moderate output file size
/screen	Lower quality output (72 dpi) but smallest possible output file size

With Adobe Acrobat on Windows Server

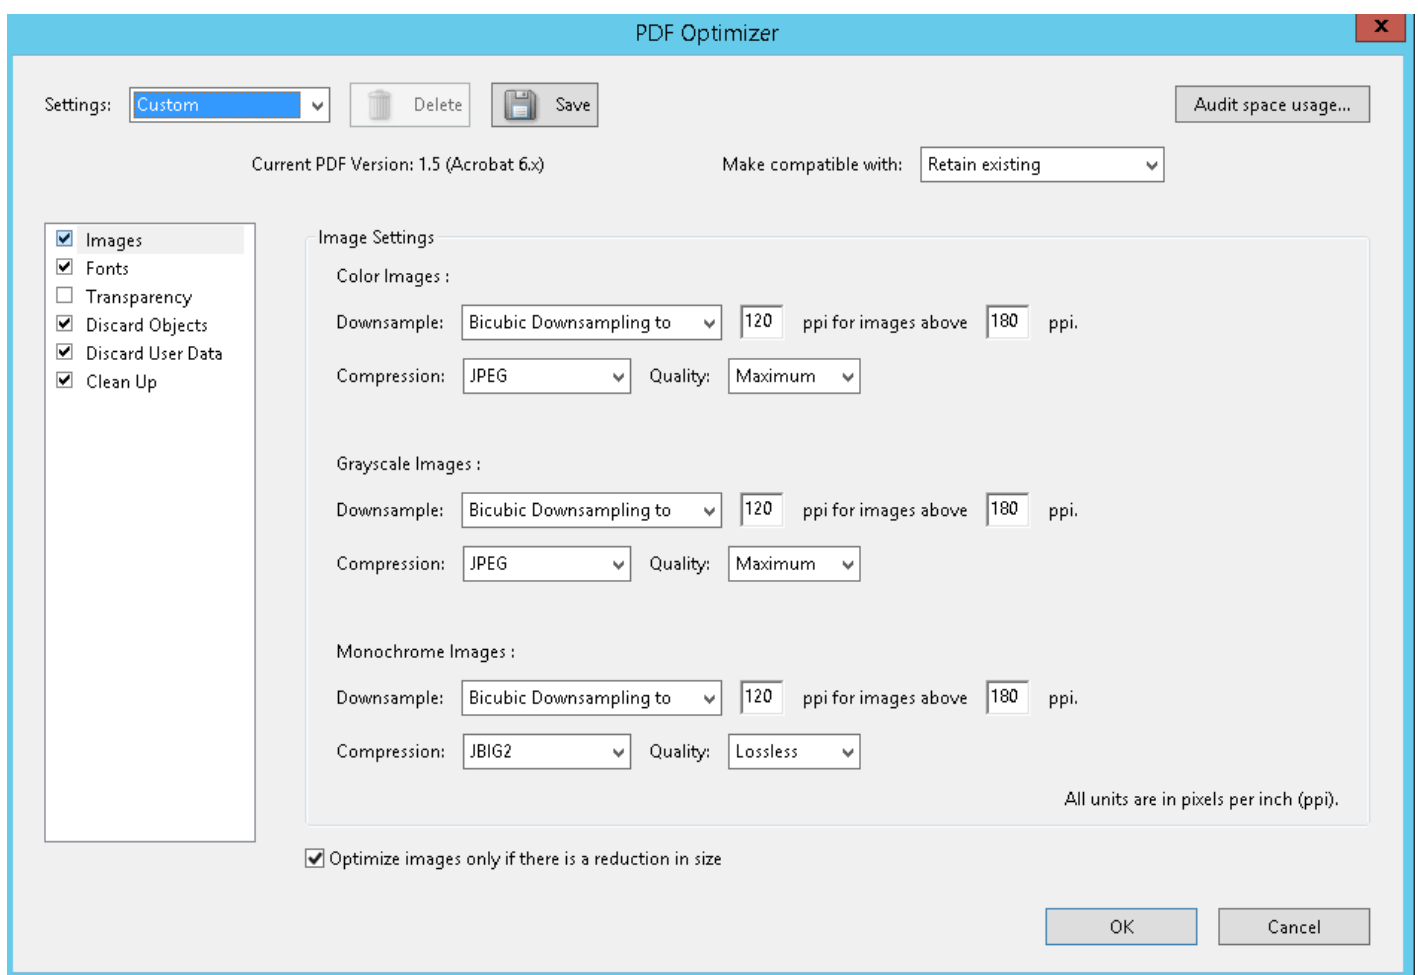

Adobe Acrobat comes with a tool to compress PDFs to smaller filesizes.

The institute has a version of Adobe Acrobat installed on our Windows Servers. To access it, please go to Applications > Internet > Windows Small (or any size)

- Open the file in Adobe Acrobat.
- Go to Advanced and select PDF Optimizer

- If the PDF is mainly for viewing purpose on the Internet, use following settings:

- Save the file with a new filename.
