

plantuml

Create diagrams based on text files.

- [Wikipedia](#)
- [Reference](#)
- Online <https://www.plantuml.com/plantuml/uml>
- <https://real-world-plantuml.com/>
- <https://github.com/joelparkerhenderson/plantuml-examples>

Example

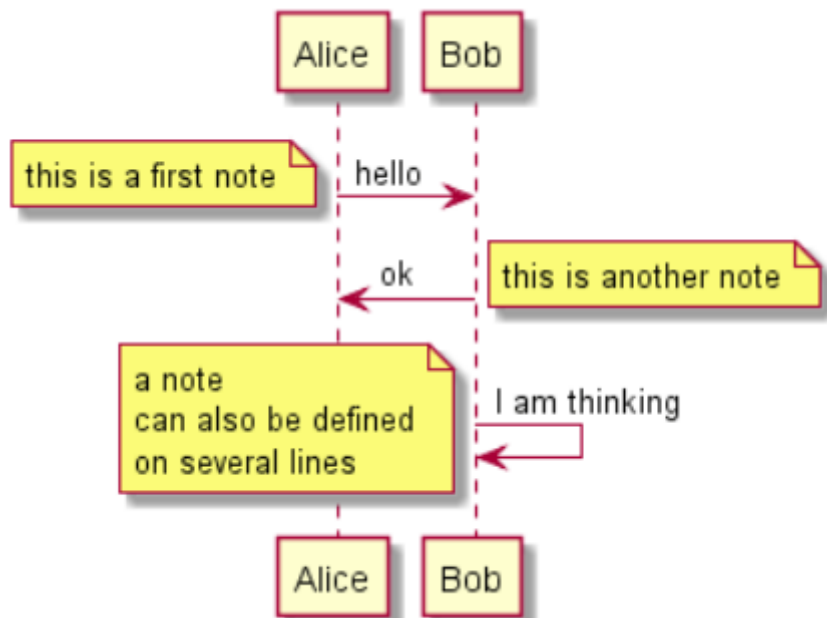

* `gedit example.plantuml`

```
@startuml
Alice->Bob : hello
note left: this is a first note
Bob->Alice : ok
note right: this is another note
Bob->Bob : I am thinking
note left
a note
can also be defined
on several lines
end note
@enduml
```

* Create the diagram [online](#) or in thinlinc via terminal:

```
$ plantuml example.puml
```

- Picture:
