

terminator

- The Terminal 'terminator' allows working simultaneous with multiple terminals
- Doc: <https://terminator-gtk2.readthedocs.io/en/>

Alternatives for power users: *tmux* with a nice config or *zellij*

Tipps

- Select all sessions in one tab of the terminal:
 - Open a second 'tab' on the window by pressing `Ctrl Shift t`.
 - Switch back to the first (initial) tab.
 - Press `Super t`.
- Set the group of all selected Terminals
 - Press `Shift Super` and click on the small three boxes in the top left border - type in the new group name
