

todo.txt

- <http://todotxt.org/> (incl. list of apps which support 'todo.txt', all OS)
 - Very simple todo list manager (GTD: getting things done).
 - Syntax: <https://github.com/todotxt/todo.txt>
- **Share** the file 'todo.txt' via drive.math.uzh.ch. **Configure all apps** to use shared file.

Thinlinc

- **GUI:** Applications > Office > QTodoTxt
- **CLI:** todo.sh

* Setup: create a file `~/.todo/config`

```
export TODO_DIR=<full path. E.g. '/home/a/crose/Nextcloud/todo'>
export TODO_FILE="$TODO_DIR/todo.txt"
export DONE_FILE="$TODO_DIR/done.txt"
export REPORT_FILE="$TODO_DIR/report.txt"
```

- Use: open a terminal and type `todo.sh -h`
- **Thunderbird** Extension 'Todo.txt': <https://addons.thunderbird.net/en-US/thunderbird/addon/todotxt-extension/>

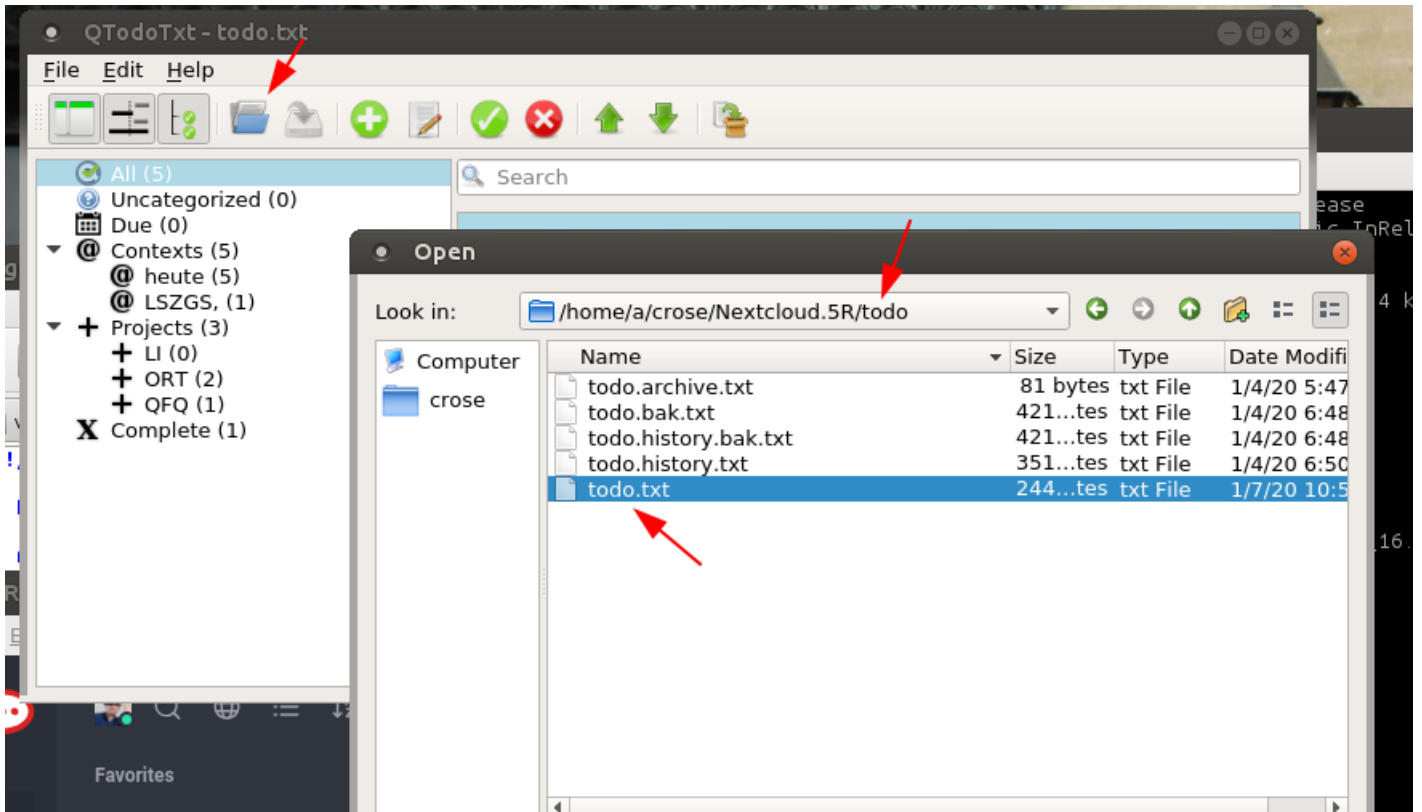

Android: Markor

- [Markor](#) (Notes App and todo.txt viewer)

Synchronize 'todo' list

- Use a cloud storage provider like <https://drive.math.uzh.ch>, <https://drive.switch.ch> or <https://dropbox.com>.
- Create a folder 'todo' on your cloud storage with a file 'todo.txt'

- Start on thinlinc 'Applications > Office > QTodoTxt'. Open your todo.txt file on your cloud storage:

- On Android install `Markor` from [F-Droid](#) or [Github](#) > choose the synchronized todo.txt file.
