- ZI Documentation: <https://www.zi.uzh.ch/en/support/network/wireless.html>

WLAN Accounts

- UZH Member: automatically created by ID
- Guests / Conferences:
 - Using Eduroam (account provided by their home organisation)
 - No Eduroam account: WLAN 'uzh-guest' - you have to provide your mobile number to get the password via SMS.

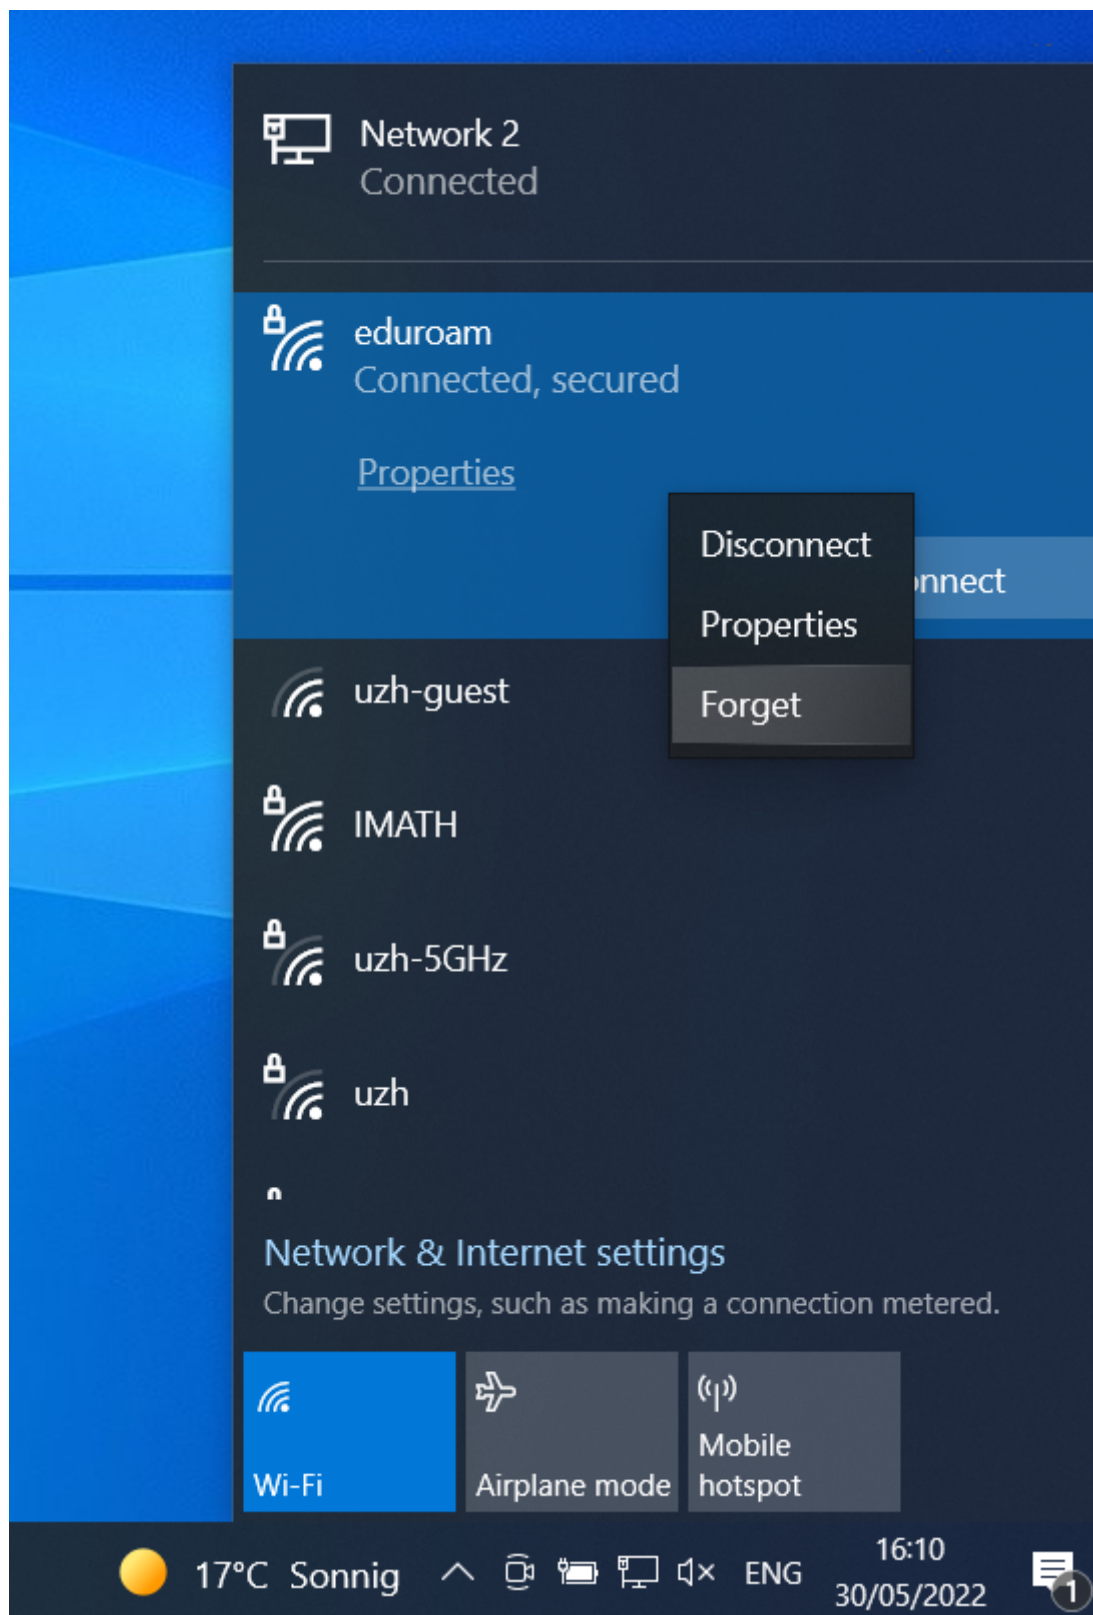

Eduroam

- Username: Your UZH Mailaddress
- Password: Your UZH Password
- EAP-Method: PEAP
- Phase 2 Auth: MSCHAPV2
- CA certificate: no validate

Problems?

If there are problems to connect to *eduroam*, please purge the old *eduroam* settings and configure *eduroam* again.

Under Windows, right click on the WLAN and choose **Forget**

Linux

The screenshot shows the 'eduroam' configuration window with the 'Security' tab selected. Red arrows point to the following fields:

- Security:** WPA & WPA2 Enterprise
- Authentication:** Protected EAP (PEAP)
- CA certificate:** (None)
- Check:** ☒ No CA certificate is required
- PEAP version:** Automatic
- Inner authentication:** MSCHAPv2
- Username:** <your (primary) uzh email>
- Password:** [masked]

Other visible fields include 'Anonymous identity' and a 'Show password' checkbox.

Notes:

- since 5.06.2024 the username is your primary UZH email address. For most of I-MATH member this is <firstname>.<lastname>@math.uzh.ch.
- If a domain is required, use *uzh.ch*
